

Jaw Thrust Brad™ Manequim

Description

This manikin allows students to use the jaw thrust procedure, often needed in cervical spine injury scenarios. The long torso also permits students to practice abdominal thrusts while the tiltable head allows for airway management and obstruction practice

- Anatomical landmarks
- Head tilt/chin lift
- Light-skinned, torso only, adult manikin
- Trains students in opening airway and CPR
- Includes 3 disposable airways, 3 mouth/nosepieces, and soft carrying bag
- Warranty: 3 years
